

SUPPLEMENT  
dated December 22, 2017 to the  
PROSPECTUS  
dated May 31, 2017, of

Yorktown Multi-Asset Income Fund  
(Class C Shares)

The following information replaces in its entirety the section appearing under the heading “Section 1 – Fund Summaries – Yorktown Multi-Asset Income Fund – Fees and Expenses” on pages 1-2 of the Prospectus:

“Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees  
(fees paid directly from your investment)

	<u>Class C</u> <u>AFFCX</u>
Maximum sales charge (load) imposed on purchases (as percentage of offering price) . . . . .	None
Maximum deferred sales charge (load) (as a percentage of the lesser of original purchase price or redemption proceeds) . . . . .	1.00%(1)
Maximum Account fee (for accounts under \$500) . . . . .	\$25/yr

Annual Fund Operating Expenses  
(Expenses that you pay each year as a percentage of the value of your investment.)

	<u>Class C</u> <u>AFFCX</u>
Management Fee . . . . .	0.40%
Distribution/Service (12b-1 Fees) . . . . .	1.00%
Other Expenses . . . . .	0.23%
Acquired Fund Fees and Expenses(2) . . . . .	0.04%
Total Annual Fund Operating Expenses (3) . . . . .	<u>1.67%</u>

- (1) Shares are generally subject to a CDSC of 1.00% if the shares are redeemed during the first 13 months after purchase, unless the dealer, at its discretion, has waived the commission advance paid by the Distributor.
- (2) “Acquired Fund Fees and Expenses” have been restated to reflect current fees and expenses.
- (3) Total Annual Fund Operating Expenses do not correlate to the ratio of average net assets in the Financial Highlights Table, which reflects the operating expenses of the Fund and does not include Acquired Fund Fees and Expenses.

Example:

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class C (AFFIX) Shares: . . . . .	\$170	\$526	\$907	\$1,976

The Example does not reflect sales charges (loads) on reinvested dividends and other distributions. If these sales charges (loads) were included, your costs would be higher.

#### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year ended January 31, 2017, the Fund’s portfolio turnover rate was 102% of the average value of its portfolio.”

The following information replaces in its entirety the second paragraph appearing under the headings “Section 1 – Fund Summaries – Yorktown Multi-Asset Income Fund – Principal Investment Strategies” and “Section 2 – Additional Information About Investment Strategies and Related Risks – Investment Objectives and Strategies of each Fund” on pages 2 and 9, respectively, of the Prospectus:

“The Adviser exercises a flexible strategy in the selection of investments and is not limited by investment style or asset class. The Income Fund may invest in debt securities, including U.S. Government securities, corporate bonds and structured notes; common stock of U.S. and foreign issuers and in other U.S. and foreign securities, including securities convertible into common stock and securities issued through private placements; securities issued by investment companies affiliated with the Adviser; real estate investment trusts and other issuers that invest, deal, or otherwise engage in transactions in real estate; and other instruments.”

The following information replaces in its entirety the section appearing under the heading “Section 1 – Fund Summaries – Yorktown Multi-Asset Income Fund – Principal Investment Risks” on pages 3-5 of the Prospectus:

“General Risks. There is a risk that you could lose all or a portion of your investment in the Fund. The value of your investment in the Fund will go up and down with the prices of the securities in which the Fund invests.

Equity Security Risk. Prices of equity securities generally fluctuate more than those of other securities, such as debt securities. Market risk, the risk that prices of securities will decrease because of the interplay of market forces, may affect a single issuer, industry or sector of the economy or may affect the market as a whole.

Company Risk. The Fund may invest in securities that involve certain special circumstances that the Adviser believes offer the opportunity for long-term capital appreciation. These investments may involve greater risks of loss than investments in securities of well-established companies with a history of consistent operating patterns.

Investment Company Risk. Any investment in an open-end investment company involves the risk that the value of shares of the investment company will go up and down in response to changes in the value of its portfolio holdings. In addition, the Fund will indirectly bear the fees and expenses of the underlying investment company.

Debt Security Risk. The values of debt securities held by the Fund are affected by rising and declining interest rates. In general, debt securities with longer term maturities tend to fall more in value when interest rates rise than debt securities with shorter terms. A debt security is also subject to credit risk, which is the possibility that the credit strength of an issuer will weaken and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default, and therefore it may lose value if the issuer is unable to pay interest or repay principal when it is due.

Junk Bonds or High Yield, High Risk Securities Risk. Bonds rated below investment grade (i.e., BB or lower by S&P or Ba or lower by Moody’s) are speculative in nature, involve greater risk of default by the issuing entity and may be subject to greater market fluctuations than higher rated fixed income securities.

**Foreign Securities Risk.** The Fund's direct or indirect investments in foreign securities, including depositary receipts, involve risks not associated with investing in U.S. securities that can adversely affect the Fund's performance. Foreign markets, particularly emerging markets, may be less liquid, more volatile and subject to less government supervision than domestic markets. The value of the Fund's investment may be negatively affected by changes in the exchange rates between the U.S. dollar and foreign currencies. There may be difficulties enforcing contractual obligations, and it may take more time for trades to clear and settle.

**Emerging Market Risk.** There are greater risks involved in investing in emerging market countries and/or their securities markets. Generally, economic structures in these countries are less diverse and mature than those in developed countries, and their political systems are less stable. Investments in emerging markets countries may be affected by national policies that restrict foreign investment in certain issuers or industries.

**Small-Cap Company Risk.** The Fund's investments in small-cap companies may involve greater risks than investments in larger, more established issuers. Smaller companies generally have narrower product lines, more limited financial resources and more limited trading markets for their stock, as compared with larger companies. Their securities may be less well-known and trade less frequently and in more limited volume than the securities of larger, more established companies.

**Real Estate Investment Trusts.** Investments in real estate investment trusts and other issuers that invest, deal, or otherwise engage in transactions in or hold real estate or interests therein expose the Fund to risks similar to investing directly in real estate and the value of these investments may be affected by changes in the value of the underlying real estate, the creditworthiness of the issuer of the investments, and changes in property taxes, interest rates and the real estate regulatory environment.

**Convertible Securities Risk.** A convertible security is a bond, debenture, note, preferred stock or other security that may be converted into or exchanged for a prescribed amount of common stock of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive the interest paid or accrued on debt or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion or exchange, such securities ordinarily provide a stream of income with generally higher yields than common stocks of the same or similar issuers, but lower than the yield on non-convertible debt. The value of a convertible security is a function of (1) its yield in comparison with the yields of other securities of comparable maturity and quality that do not have a conversion privilege and (2) its worth, at market value, if converted into or exchanged for the underlying common stock. Convertible securities are typically issued by smaller capitalized companies whose stock prices may be volatile. The price of a convertible security often reflects such variations in the price of the underlying common stock in a way that non-convertible debt does not."

The following information replaces in its entirety the section appearing under the heading "Section 1 – Fund Summaries – Yorktown Multi-Asset Income Fund – Management – Portfolio Managers" on page 7 of the Prospectus:

"David D. Basten, President and Chief Investment Officer, has served as Portfolio Manager to the Fund since its inception in 1997. David M. Basten, Portfolio Manager, has served as Portfolio Manager to the Fund since 2005. Michael Dixon, Portfolio Manager, has acted as Portfolio Manager to the Fund since 2012."

The following information replaces in its entirety the information appearing under the heading "Section 2 – Additional Information About Investment Strategies and Related Risks – Principal Investment Risks – Investment Company Risk" on pages 9-10 of the Prospectus:

"Investment Company Risk. Any investment in an open-end or closed-end investment company involves risk and, although the Fund invests in investment companies affiliated with the Adviser, this practice does not eliminate investment risk. The value of shares of investment companies will go up and down in response to changes in the value of its portfolio holdings. The value of equity securities held by investment companies rises and falls in response to many factors, including the historical and prospective earnings of

the issuer of the stock, the value of its assets, general economic conditions, interest rates, investor perceptions, and market liquidity. Debt securities held by investment companies are vulnerable to credit risk and interest rate fluctuations. When interest rates rise, the price of debt securities falls. In general, debt securities with longer term maturities tend to fall more in value when interest rates rise than debt securities with shorter terms.

Some of the investment companies also could incur more risks than others. For example, they may trade their portfolios more actively (which results in higher brokerage costs) or invest in companies whose securities are more volatile. In addition, they may engage in investment practices that entail greater risks. In particular, the investment companies may: invest in securities of foreign issuers, including securities of emerging markets, which may be more volatile and less liquid than other securities; invest in illiquid securities; invest in warrants; lend their portfolio securities; sell securities short; borrow money for investment purposes; invest 25% or more of their total assets in one industry; and enter into options, futures and forward currency contracts.

Investing in the Fund also involves certain additional expenses and certain tax consequences that would not be present in a direct investment in other investment companies. You should recognize that you may invest directly in the investment companies and that, by investing in the investment companies indirectly through a Fund, you will bear not only your proportionate share of the expenses of the Fund (including operating costs and investment advisory and administrative fees) but also indirectly similar expenses of the investment companies.”

The following information replaces in its entirety the second paragraph appearing under the heading “Section 3 – Who Manages Your Money – The Investment Adviser” on page 15 of the Prospectus:

“The Adviser has served as the investment adviser to each Fund since its inception. The Adviser was organized in 1984 and is controlled by David D. Basten. The Portfolio Managers of each Fund are responsible for the day-to-day management of each Fund’s portfolio.”

The following information replaces in its entirety the section appearing under the heading “Section 3 – Who Manages Your Money – The Portfolio Managers” on page 15 of the Prospectus:

“Mr. David D. Basten is the Adviser’s Chief Investment Officer and a portfolio manager for the Trust, having served in that capacity since commencement of the Fund’s operations. Mr. David D. Basten is President and Director of the Adviser, Managing Partner of Waived Enterprises, LLC and partner of Downtown Enterprises.

Mr. David M. Basten has served as portfolio manager since 2005 and prior to that held various positions at the Adviser, including as a securities analyst.

Mr. Michael Dixon has served as portfolio manager since 2012 and prior to that was an account manager with the investment advisory firm Flippin, Bruce, & Porter, Inc., from May, 2002 to 2012. Mr. Dixon has over fifteen years of experience in the financial services industry.

A discussion of the basis for the March 29, 2017 decision of the Board to approve the investment advisory agreements with the Adviser is available in the Trust’s Statement of Additional Information, dated May 31, 2017 and the Semi-Annual Report to Shareholders, dated July 30, 2017.”

YORKTOWN MULTI-ASSET INCOME FUND  
(formerly API Multi-Asset Income Fund)

AFFCX

This prospectus relates only to Class C Shares of the Yorktown Multi-Asset Fund. The Trust offers other Funds and share classes via a different prospectus.

**PROSPECTUS DATED MAY 31, 2017**

Like all mutual fund shares, the U.S. Securities and Exchange Commission has not approved or disapproved the shares offered in this prospectus or determined whether this prospectus is accurate or complete. Anyone who tells you otherwise is committing a crime.

# TABLE OF CONTENTS

## Section 1 | Fund Summary

---

This section provides you with an overview of the Fund, including investment objectives, fees and expenses, and historical performance information.

## Section 2 | Additional Information About Investment Strategies and Related Risks

---

This section sets forth additional information about the Fund.

- 9** Investment Objectives and Strategies
- 10** Principal Investment Risks
  - Temporary Investments
- 14** Portfolio Holdings Disclosure

## Section 3 | Who Manages Your Money

---

This section gives you a detailed discussion of our investment adviser and Portfolio Managers

- 15** The Investment Adviser
- 15** The Portfolio Managers

## Section 4 | How You Can Buy and Sell Shares

---

This section provides the information you need to move money into or out of your account

- 16** How To Buy Shares
- 19** How To Sell Shares

## **Section 5 | General Information**

---

This section summarizes the Funds' distribution policies and other general Fund information

- 21** Dividends, Distributions and Taxes
- 22** Net Asset Value
- 23** Fair Value Pricing
- 23** Frequent Trading
- 24** Acquired Fund Fees and Expenses
- 25** Distribution and Service Plans
- 26** General Information
- 29** Privacy Policy

## **Section 6 | Financial Highlights**

---

This section provides the Fund's financial performance for the past five years.

## **Section 7 | For More Information**

---

This section tells you how to obtain additional information relating to the Funds.

## Section 1 | FUND SUMMARY

---

### Yorktown Multi-Asset Income Fund (formerly API Multi-Asset Income Fund)

**Investment Objective** – Current income with limited credit risk.

#### Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

<b>Shareholder Fees</b> (fees paid directly from your investment)	
	<b>Class C AFFCX</b>
Maximum sales charge (load) imposed on purchases (as percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of the lesser of original purchase price or redemption proceeds)	1.00%(1)
Maximum Account fee (for accounts under \$500)	\$25/yr

<b>Annual Fund Operating Expenses</b> (Expenses that you pay each year as a percentage of the value of your investment.)	
	<b>Class C AFFCX</b>
Management Fee	0.40%
Distribution/Service (12b-1 Fees)	1.00%
Other Expenses	0.23%
Acquired Fund Fees and Expenses	1.39%
<b>Total Annual Fund Operating Expenses (2)</b>	<b>3.02%</b>

(1) Shares are generally subject to a CDSC of 1.00% if the shares are redeemed during the first 13 months after purchase, unless the dealer, at its discretion, has waived the commission advance paid by the Distributor.

(2) Total Annual Fund Operating Expenses do not correlate to the ratio of average net assets in the Financial Highlights Table, which reflects the operating expenses of the Fund and does not include Acquired Fund Fees and Expenses.

## Example:

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class C (AFFIX) Shares:	\$305	\$933	\$1,587	\$3,337

The Example does not reflect sales charges (loads) on reinvested dividends and other distributions. If these sales charges (loads) were included, your costs would be higher.

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year ended January 31, 2017, the Fund's portfolio turnover rate was 102% of the average value of its portfolio.

## Principal Investment Strategies

The Multi-Asset Income Fund invests in securities that, in the Adviser's opinion, offer the opportunity for current income with limited credit risk.

The Adviser exercises a flexible strategy in the selection of investments and is not limited by investment style or asset class. The Income Fund may invest in debt securities, including U.S. Government securities, corporate bonds and structured notes; common stock of U.S. and foreign issuers and in other U.S. and foreign securities, including securities convertible into common stock and securities issued through private placements; securities issued by Underlying Funds; ETF's; real estate investment trusts and other issuers that invest, deal, or otherwise engage in transactions in real estate; and other instruments.

The Adviser invests directly in equity or debt securities when it believes attractive investment opportunities exist. In deciding whether to invest in a debt security, the Adviser focuses on the maturity of the obligations and the credit quality of the security, including the underlying rating of insured bonds. When the Adviser believes there is a falling interest rate environment, the Income Fund generally will purchase longer maturity obligations. Similarly, when the Adviser believes there is a rising interest rate environment, the Income Fund generally will purchase shorter maturity obligations. Although the Adviser considers ratings in determining whether securities convertible into common stock or debt securities are appropriate investments for the Income Fund, such

securities may include investments rated below investment grade, commonly known as “junk bonds.” When investing in equity securities, the Adviser looks for companies with favorable income-paying history and that have prospects for income payments to continue to increase.

When investing in Underlying Funds, the Adviser considers, among other things, the Underlying Funds’ past performance and their investment objectives and policies, the investment style, reputation and quality of their investment advisers and the Underlying Funds’ size and cost structure. The Adviser selects ETF’s in which to invest based on a number of factors, including an analysis of their past performance, market sector and liquidity. Through direct investments and indirect investments in Underlying Funds, ETF’s, the Income Fund may have significant exposure to foreign securities, including high yield securities, emerging market securities, small-cap securities and specific sectors of the market.

The Adviser may sell a security or redeem shares of an Underlying Fund given a variety of circumstances, such as: when an investment no longer appears to the Adviser to offer the potential to achieve the Income Fund’s investment objective; when an investment’s performance does not meet the Adviser’s expectations; when an investment opportunity arises that the Adviser believes is more compelling; to realize gains or limit losses; or to raise cash to meet shareholder redemptions or to pay expenses.

The Fund may, from time to time, take temporary defensive positions that are inconsistent with the Fund’s principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions. When the Fund takes a defensive position, the Fund’s assets may be held in cash and/or invested in money market mutual funds, money market instruments, including repurchase agreements or other short term securities considered by the Adviser to be of a defensive nature. When the Fund is invested in this manner, it may not achieve its investment objective.

## Principal Investment Risks

**General Risks.** There is a risk that you could lose all or a portion of your investment in the Fund. The value of your investment in the Fund will go up and down with the prices of the securities in which the Fund invests.

**Equity Security Risk.** Prices of equity securities generally fluctuate more than those of other securities, such as debt securities. Market risk, the risk that prices of securities will decrease because of the interplay of market forces, may affect a single issuer, industry or sector of the economy or may affect the market as a whole.

**Company Risk.** The Fund may invest in securities that involve certain special circumstances that the Adviser believes offer the opportunity for long-term capital appreciation. These investments may involve greater risks of loss than investments in securities of well-established companies with a history of consistent operating patterns.

**Investment Company Risk.** Any investment in an open-end or closed-end investment company involves risk and, although the Fund invests in a number of Underlying Funds, this practice does not eliminate investment risk. The value of shares of an Underlying Fund will go up and down in response to changes in the value of its portfolio holdings.

**Underlying Fund Risk.** None of the Underlying Funds are or will be affiliated with the Fund or the Adviser. Therefore, investment decisions by the investment advisers of the Underlying Funds are made independently of

the Fund and the Fund's Adviser. The investment adviser of one Underlying Fund may be purchasing securities of the same issuer whose securities are being sold by the investment adviser of another Underlying Fund. The result of this would be an indirect expense to the Fund without accomplishing any investment purpose.

**Closed-End Fund Risk.** Shares of closed-end funds frequently trade at a price per share that is less than the net asset value per share. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease or that when the Fund seeks to sell shares of a closed-end fund it can receive the net asset value of those shares.

**Business Development Companies Risk.** Business Development Companies ("BDC's) are a specialized form of closed-end fund that invest generally in small developing companies and financially troubled businesses. BDC's invest in private companies and thinly traded securities of public companies, including debt instruments. Generally, little public information exists for private and thinly traded companies and there is a risk that investors may not be able to make fully informed investment decisions. Many debt investments in which a BDC may invest will not be rated by a credit rating agency and will be below investment grade quality. Risks faced by BDCs include: competition for limited BDC investment opportunities; the liquidity of a BDC's private investments; uncertainty as to the value of a BDC's private investments; risks associated with access to capital and leverage; and reliance on the management of a BDC. The Fund's investments in BDC's are similar and include portfolio company risk, leverage risk, market and valuation risk, price volatility risk and liquidity risk.

**Exchange Traded Fund Risk.** ETF's and index funds are not managed in the traditional sense, using economic, financial and market analysis, and the adverse financial situation of an issuer will not directly result in its elimination from the index. In addition, investments in ETF's involve risks similar to investments in closed-end funds including, but not limited to, the possibility that the shares of ETF's may trade at a market discount.

**Debt Security Risk.** The values of debt securities held by the Fund are affected by rising and declining interest rates. In general, debt securities with longer term maturities tend to fall more in value when interest rates rise than debt securities with shorter terms. A debt security is also subject to credit risk, which is the possibility that the credit strength of an issuer will weaken and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default, and therefore it may lose value if the issuer is unable to pay interest or repay principal when it is due.

**Junk Bonds or High Yield, High Risk Securities Risk.** Bonds rated below investment grade (i.e., BB or lower by S&P or Ba or lower by Moody's) are speculative in nature, involve greater risk of default by the issuing entity and may be subject to greater market fluctuations than higher rated fixed income securities.

**Foreign Securities Risk.** The Fund's direct or indirect investments in foreign securities, including depositary receipts, involve risks not associated with investing in U.S. securities that can adversely affect the Fund's performance. Foreign markets, particularly emerging markets, may be less liquid, more volatile and subject to less government supervision than domestic markets. The value of the Fund's investment may be negatively affected by changes in the exchange rates between the U.S. dollar and foreign currencies. There may be difficulties enforcing contractual obligations, and it may take more time for trades to clear and settle.

**Emerging Market Risk.** There are greater risks involved in investing in emerging market countries and/or their securities markets. Generally, economic structures in these countries are less diverse and mature than those in developed countries, and their political systems are less stable. Investments in emerging markets countries may be affected by national policies that restrict foreign investment in certain issuers or industries.

**Small-Cap Company Risk.** The Fund's investments in small-cap companies may involve greater risks than investments in larger, more established issuers. Smaller companies generally have narrower product lines, more limited financial resources and more limited trading markets for their stock, as compared with larger companies. Their securities may be less well-known and trade less frequently and in more limited volume than the securities of larger, more established companies.

**Real Estate Investment Trusts.** Investments in real estate investment trusts and other issuers that invest, deal, or otherwise engage in transactions in or hold real estate or interests therein expose the Fund to risks similar to investing directly in real estate and the value of these investments may be affected by changes in the value of the underlying real estate, the creditworthiness of the issuer of the investments, and changes in property taxes, interest rates and the real estate regulatory environment.

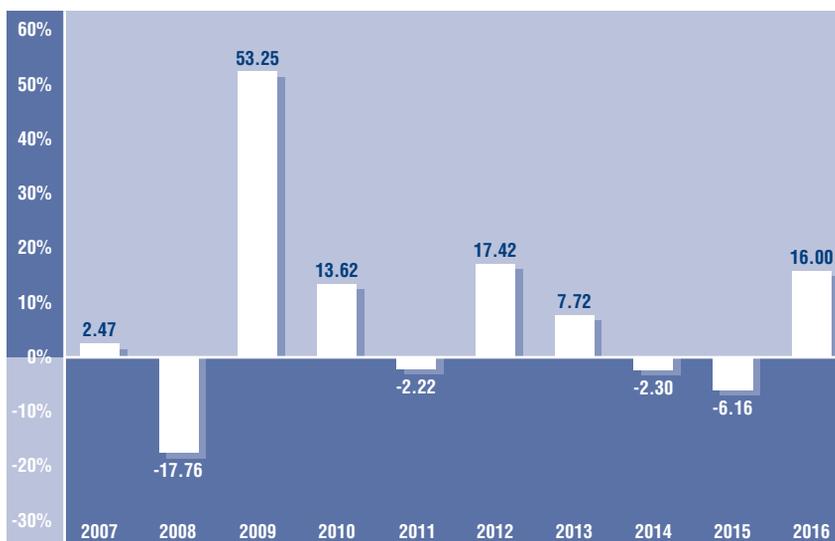

**Convertible Securities Risk.** A convertible security is a bond, debenture, note, preferred stock or other security that may be converted into or exchanged for a prescribed amount of common stock of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive the interest paid or accrued on debt or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion or exchange, such securities ordinarily provide a stream of income with generally higher yields than common stocks of the same or similar issuers, but lower than the yield on non-convertible debt. The value of a convertible security is a function of (1) its yield in comparison with the yields of other securities of comparable maturity and quality that do not have a conversion privilege and (2) its worth, at market value, if converted into or exchanged for the underlying common stock. Convertible securities are typically issued by smaller capitalized companies whose stock prices may be volatile. The price of a convertible security often reflects such variations in the price of the underlying common stock in a way that non-convertible debt does not.

## The Fund's Past Performance

The following bar chart and table below provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for 1, 5, and 10 years compare with those of a broad measure of market performance. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at [www.apifunds.com](http://www.apifunds.com) and by calling toll-free 888-933-8274.

### Year-By-Year Annual Returns – Class A Shares (APIUX)

(for calendar years ending on December 31)

During the period covered by the bar chart, Class A Shares' highest return for a quarter was 27.87% (quarter ended June 30, 2009) and the lowest return for a quarter was -13.06% (quarter ended September 30, 2008). Class A Shares' year to date total return as of March 31, 2017 was +4.23%.

**Average Annual Total Returns for the Fund's Class A Shares (APIUX)  
(for periods ending on December 31, 2016)**

	One Year	Five Years	Ten Years
Return Before Taxes	9.33%	4.86%	6.87%
Return After-Taxes on Distributions (1)	5.99%	1.82%	4.17%
Return After-Taxes on Distributions and Sale of Fund Shares (1)	5.15%	2.37%	4.22%
Dow Jones Conservative Relative Risk Index (2) (reflects no deduction for fee, expenses or taxes)	3.01%	2.59%	4.04%

	One Year	Five Years	Ten Years
Average Annual Total Return Before Taxes - Class L Shares (AFFIX)	15.37%	5.60%	6.24%

	One Year	Five Years	Inception 4/1/2010
Average Annual Total Return Before Taxes - Institutional Class Shares (APIIX)	16.74%	6.66%	5.76%

(1) After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. After-Tax Returns are shown for only Class A Shares. After-tax returns for Class L and Institutional Class Shares will vary.

(2) The Dow Jones Conservative Relative Risk Index is made up of underlying Dow Jones indices. Each Dow Jones Relative Risk Index consists of multiple sub -indexes that represent stocks, bonds and cash. The sub-indexes in turn contain large numbers of components. The Index is designed to measure portfolios at a conservative risk level. To reflect risk levels, the indexes allocate differently among the underlying stock, bond and cash sub-indexes. The Index attempts to maintain a 20% level of risk relative to the risk of an all stock portfolio.

## Management

**Investment Adviser** – Yorktown Management & Research Company, Inc.

**Portfolio Managers** – David D. Basten, President and Chief Investment Officer, has served as Portfolio Manager to the Fund since its inception in 1997. David M. Basten, Portfolio Manager, has served as Portfolio Manager to the Fund since 2005. Brentz East, Securities Analyst, has acted as Portfolio Manager to the Fund since 2011. Michael Dixon, Portfolio Manager, has acted as Portfolio Manager to the Fund since 2012.

## **Purchase and Sale of Fund Shares**

You may purchase, redeem or exchange shares of the Fund on any business day, which is any day the New York Stock Exchange is open for business. You may purchase, redeem or exchange shares of the Fund either through a financial advisor or directly from the Fund. The minimum initial investment in the Fund's Class A and Class L Shares is \$1,000, and the minimum for additional investments is \$100. The minimum initial investment in the Fund's Institutional Class Shares is \$1,000,000, and the minimum for additional investments is \$100,000. There are no minimums for purchases or exchanges through employer-sponsored retirement plans. The Fund shares are redeemable on any business day by contacting your financial adviser, or by written request to the Fund, by telephone, or by wire transfer.

## **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.

## **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its distributor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your sales person to recommend the Fund over another investment. Ask your sales person or visit your financial intermediary's website for more information.

---

## Section 2 | ADDITIONAL INFORMATION ABOUT INVESTMENT STRATEGIES AND RELATED RISKS

---

### Investment Objectives and Strategies

**Investment Objective:** Current income with limited credit risk.

#### Principal Investment Strategies:

The Income Fund invests in securities that, in the Adviser's opinion, offer the opportunity for current income with limited credit risk.

The Adviser exercises a flexible strategy in the selection of investments and is not limited by investment style or asset class. The Income Fund may invest in debt securities, including U.S. Government securities and corporate bonds; common stock of U.S. and foreign issuers and in other U.S. and foreign securities, including securities convertible into common stock and securities issued through private placements; securities issued by Underlying Funds; ETF's; real estate investment trusts and other issuers that invest, deal, or otherwise engage in transactions in real estate; and other instruments.

The Adviser invests directly in equity or debt securities when it believes attractive investment opportunities exist. In deciding whether to invest in a debt security, the Adviser focuses on the maturity of the obligations and the credit quality of the security, including the underlying rating of insured bonds. When the Adviser believes there is a falling interest rate environment, the Income Fund generally will purchase longer maturity obligations. Similarly, when the Adviser believes there is a rising interest rate environment, the Income Fund generally will purchase shorter maturity obligations. Although the Adviser considers ratings in determining whether securities convertible into common stock or debt securities are appropriate investments for the Income Fund, such securities may, in rare instances, include investments rated below investment grade, commonly known as "junk bonds." When investing in equity securities, the Adviser looks for companies with favorable income-paying history and that have prospects for income payments to continue to increase.

Credit Risk is always present in an income producing security. To manage such risk, the Adviser considers ratings, if any, the payment history of the security, the underlying strength of the issuer to determine the likelihood of continued payments, the overall levels of debt being serviced by the issuer, the future growth prospects for the issuer, and the possible effects of outside market forces.

When investing in Underlying Funds, the Adviser considers, among other things, the Underlying Funds' past performance and their investment objectives and policies, the investment style, reputation and quality of their investment advisers and the Underlying Funds' size and cost structure. The Adviser selects ETF's in which to invest based on a number of factors, including an analysis of their past performance, market sector and liquidity. Through direct investments and indirect investments in Underlying Funds, ETF's, the Income Fund may have significant exposure to foreign securities, including emerging market securities, small-cap securities and specific sectors of the market.

The Adviser may sell a security or redeem shares of an Underlying Fund given a variety of circumstances, such as: when an investment no longer appears to the Adviser to offer the potential to achieve the Income Fund's investment objective; when an investment's performance does not meet the Adviser's expectations; when an investment opportunity arises that the Adviser believes is more compelling; to realize gains or limit losses; or to raise cash to meet shareholder redemptions or to pay expenses.

Pending investment, for liquidity or when the Adviser believes market conditions warrant a defensive position, the Fund may temporarily hold cash or invest all or a portion of its assets in money market mutual funds or money market instruments, including repurchase agreements. During periods when the Fund takes a defensive position, it will not be pursuing its principal investment strategies and will not be seeking to achieve its investment objective.

### **Principal Investment Risks**

**General Risks.** There is a risk that you could lose all or a portion of your investment in the Fund. The value of your investment in the Fund will go up and down with the prices of the securities in which the Fund invests. There is no assurance that the Fund will meet its investment objective. For more information relating to the risks of investing in the Funds, please see the Trust's Statement of Additional Information ("SAI").

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

**Equity Security Risk.** Prices of equity securities generally fluctuate more than those of other securities, such as debt securities. Market risk, the risk that prices of securities will decrease because of the interplay of market forces, may affect a single issuer, industry or sector of the economy or may affect the market as a whole. The Fund may experience a substantial or complete loss on an individual stock. At different times, the Fund's performance may be especially subject to the performance of the specific industries and sectors that are selected by the Adviser. Some of the Fund's portfolio securities may not be widely traded and the Fund's position in such securities may be substantial in relation to the market for such securities. Accordingly, it may be difficult or impossible for the Fund to dispose of such securities at a desired time or price and the Fund may lose money as a result of any such sales.

**Company Risk.** The Fund may invest in securities that involve certain special circumstances (including bankruptcy) that the Adviser believes offer the opportunity for long-term capital appreciation. These investments may involve greater risks of loss than investments in securities of well-established companies with a history of consistent operating patterns. There is always a risk that the Adviser will not properly assess the potential for an issuer's future growth, or that an issuer will not realize that potential. Additionally, investments in securities of companies being restructured involve special risks, including difficulty in obtaining information as to the financial condition of such issuers and the fact that the market prices of such securities are subject to above-average price volatility.

**Investment Company Risk.** Any investment in an open-end or closed-end investment company involves risk and, although the Fund invests in a number of Underlying Funds, this practice does not eliminate investment risk. The value of shares of an Underlying Fund will go up and down in response to changes in the value of its

portfolio holdings. The value of equity securities held by an Underlying Fund rises and falls in response to many factors, including the historical and prospective earnings of the issuer of the stock, the value of its assets, general economic conditions, interest rates, investor perceptions, and market liquidity. Debt securities held by an Underlying Fund are vulnerable to credit risk and interest rate fluctuations. When interest rates rise, the price of debt securities falls. In general, debt securities with longer term maturities tend to fall more in value when interest rates rise than debt securities with shorter terms.

None of the Underlying Funds (except Yorktown Funds) are or will be affiliated with the Funds or their Adviser. Therefore, investment decisions by the investment advisers of the Underlying Funds are made independently of the Funds and the Funds' Adviser. The investment adviser of one Underlying Fund may be purchasing securities of the same issuer whose securities are being sold by the investment adviser of another Underlying Fund. The result of this would be an indirect expense to the Fund without accomplishing any investment purpose.

Some of the Underlying Funds also could incur more risks than others. For example, they may trade their portfolios more actively (which results in higher brokerage costs) or invest in companies whose securities are more volatile. In addition, they may engage in investment practices that entail greater risks. In particular, the Underlying Funds may: invest in securities of foreign issuers, including securities of emerging markets, which may be more volatile and less liquid than other securities; invest in illiquid securities; invest in warrants; lend their portfolio securities; sell securities short; borrow money for investment purposes; invest 25% or more of their total assets in one industry; and enter into options, futures and forward currency contracts.

Investing in the Funds also involves certain additional expenses and certain tax consequences that would not be present in a direct investment in the Underlying Funds. You should recognize that you may invest directly in the Underlying Funds and that, by investing in the Underlying Funds indirectly through the Fund, you will bear not only your proportionate share of the expenses of the Fund (including operating costs and investment advisory and administrative fees) but also indirectly similar expenses of the Underlying Funds. When an Index Security or Enhanced Index Product is an investment company security, these risks also apply.

**Closed-End Fund Risk.** Shares of closed-end funds frequently trade at a price per share that is less than the net asset value per share. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Funds will ever decrease or that when the Fund seeks to sell shares of a closed-end fund it can receive the net asset value of those shares.

**Business Development Companies Risk.** Business Development Companies ("BDC's) are a specialized form of closed-end fund that invest generally in small developing companies and financially troubled businesses. BDC's invest in private companies and thinly traded securities of public companies, including debt instruments. Generally, little public information exists for private and thinly traded companies and there is a risk that investors may not be able to make fully informed investment decisions. Many debt investments in which a BDC may invest will not be rated by a credit rating agency and will be below investment grade quality. Risks faced by BDCs include: competition for limited BDC investment opportunities; the liquidity of a BDC's private investments; uncertainty as to the value of a BDC's private investments; risks associated with access to capital and leverage; and reliance on the management of a BDC. The Fund's investments in BDC's are similar and include portfolio company risk, leverage risk, market and valuation risk, price volatility risk and liquidity risk.

**Exchange Traded Fund Risk.** ETF's and index funds are not managed in the traditional sense, using economic, financial and market analysis, and the adverse financial situation of an issuer will not directly result in its elimination from the index. In addition, investments in ETF's involve risks similar to investments in closed-end funds including, but not limited to, the possibility that the shares of ETF's may trade at a market discount.

**Leverage Risk.** Leveraging may exaggerate the effect on the net asset value of any increase or decrease in the market value of the Fund's portfolio securities. Money borrowed will be subject to interest and other costs, which may not be recovered by appreciation of the securities purchased.

**Debt Security Risk.** The values of debt securities held by the Fund are affected by rising and declining interest rates. In general, debt securities with longer -term maturities tend to fall more in value when interest rates rise than debt securities with shorter terms. A debt security is also subject to credit risk, which is the possibility that the credit strength of an issuer will weaken and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default, and therefore it may lose value if the issuer is unable to pay interest or repay principal when it is due. In addition, the Fund investing directly or indirectly in debt securities may be subject to the following risks:

**Investment Grade Securities Risk.** Debt securities are rated by national bond ratings agencies. Securities rated BBB by S&P or Baa by Moody's are considered investment grade securities, but are somewhat riskier than higher rated obligations because they are regarded as having only an adequate capacity to pay principal and interest, and are considered to lack outstanding investment characteristics.

**"Junk Bonds" or High Yield, High Risk Securities Risk.** Bonds rated below investment grade (i.e., BB or lower by S&P or Ba or lower by Moody's) ("junk bonds") are speculative in nature, involve greater risk of default by the issuing entity and may be subject to greater market fluctuations than higher rated fixed income securities. They are usually issued by companies without long track records of sales and earnings, or by those companies with questionable credit strength. The retail secondary market for these "junk bonds" may be less liquid than that of higher rated securities and adverse conditions could make it difficult at times to sell certain securities or could result in lower prices than those used in calculating the Fund's net asset value. The Fund investing in "junk bonds" may also be subject to greater credit risk because it may invest in debt securities issued in connection with corporate restructuring by highly leveraged issuers or in debt securities not current in the payment of interest or principal or in default.

**Foreign Securities Risk.** The Fund's direct or indirect investments in foreign securities, including depositary receipts, involve risks not associated with investing in U.S. securities that can adversely affect the Fund's performance. Foreign markets, particularly emerging markets, may be less liquid, more volatile and subject to less government supervision than domestic markets. The value of the Fund's investment may be negatively affected by changes in the exchange rates between the U.S. dollar and foreign currencies. There may be difficulties enforcing contractual obligations, and it may take more time for trades to clear and settle.

**Emerging Market Risk.** There are greater risks involved in investing in emerging market countries and/or their securities markets. Generally, economic structures in these countries are less diverse and mature than those in developed countries, and their political systems are less stable. Investments in emerging markets countries may be affected by national policies that restrict foreign investment in certain issuers or industries. The small size of

their securities markets and low trading volumes can make investments illiquid, more difficult to value and more volatile than investments in developed countries and such securities may be subject to abrupt and severe price declines. As a result, the Fund investing in emerging market countries may be required to establish special custody or other arrangements before investing.

**Small-Cap Company Risk.** The Fund's investments in small-cap companies may involve greater risks than investments in larger, more established issuers. Smaller companies generally have narrower product lines, more limited financial resources and more limited trading markets for their stock, as compared with larger companies. Their securities may be less well-known and trade less frequently and in more limited volume than the securities of larger, more established companies. In addition, small-cap companies are typically subject to greater changes in earnings and business prospects than larger companies. Consequently, the prices of small company stocks tend to rise and fall in value more frequently than the stocks of larger companies. Although investing in small-cap companies offers potential for above-average returns, the companies may not succeed and the value of their stock could decline significantly.

**Real Estate Investment Trusts.** Investments in real estate investment trusts and other issuers that invest, deal, or otherwise engage in transactions in or hold real estate or interests therein expose the Fund to risks similar to investing directly in real estate and the value of these investments may be affected by changes in the value of the underlying real estate, the creditworthiness of the issuer of the investments, and changes in property taxes, interest rates and the real estate regulatory environment.

**Convertible Securities Risk.** A convertible security is a bond, debenture, note, preferred stock or other security that may be converted into or exchanged for a prescribed amount of common stock of the same or a different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive the interest paid or accrued on debt or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion or exchange, such securities ordinarily provide a stream of income with generally higher yields than common stocks of the same or similar issuers, but lower than the yield on non-convertible debt. The value of a convertible security is a function of (1) its yield in comparison with the yields of other securities of comparable maturity and quality that do not have a conversion privilege and (2) its worth, at market value, if converted into or exchanged for the underlying common stock. Convertible securities are typically issued by smaller capitalized companies whose stock prices may be volatile. The price of a convertible security often reflects such variations in the price of the underlying common stock in a way that non-convertible debt does not.

**Privately Placed Securities Risk.** Investments in privately placed securities involve a high degree of risk. The issuers of privately placed securities are not typically subject to the same regulatory requirements and oversight to which public issuers are subject, and there may be very little public information available about the issuers and their performance. In addition, because the Fund's ability to sell these securities may be significantly restricted, they may be deemed illiquid and it may be more difficult for the Fund to sell them at an advantageous price and time. Because there is generally no ready public market for these securities, they may also be difficult to value and the Fund may need to determine a fair value for these holdings under policies approved by the Trust's Board of Trustees (the "Board").

**Credit Liquidity and Volatility Risk.** The markets for credit instruments have experienced periods of extreme illiquidity and volatility. General market uncertainty and consequent repricing risk have, in the past, led to

market imbalances of sellers and buyers, which in turn resulted in significant valuation uncertainties in a variety of debt securities and significant and rapid value declines in certain instances. Under those kinds of conditions, valuation of some of the Funds' fixed income securities could be uncertain and/or result in sudden and significant value declines in its holdings. In addition, future illiquidity and volatility in the credit markets may directly and adversely affect the setting of dividend rates.

## **Non-Principal Strategies and Risks**

### **Portfolio Turnover.**

The Fund, directly or indirectly, may engage in active and frequent trading of portfolio securities. If the Fund does trade in this way, it may incur increased transaction costs, which can lower the actual return on your investment. Active trading may also increase short-term capital gains and losses, which may affect the taxes you have to pay.

### **Underlying Funds.**

The Fund may invest in shares of the same Underlying Fund. However, the Fund and its affiliates together are generally restricted as to the percentage of an Underlying Fund's total outstanding voting shares it may own, unless the Underlying Fund has received an exemption from the U.S. Securities and Exchange Commission (the "SEC") permitting, under certain conditions, investment companies such as the Fund and its affiliates to acquire an Underlying Fund's voting shares in excess of such restrictions. The Trust has received an exemptive order from the SEC allowing each of its Funds to invest in Underlying Funds in excess of these limitations, subject to certain conditions and restrictions. Accordingly, to the extent that the Fund invests in Underlying Funds in excess of those limitations, the investment risk to the Fund of such investments will increase.

## **Portfolio Holdings Disclosure**

A description of the policies and procedures employed by the Fund with respect to the disclosure of Fund portfolio holdings is available in the Funds' Statement of Additional Information ("SAI"), dated May 31, 2017.

## Section 3 | WHO MANAGES YOUR MONEY

---

This section gives you a detailed discussion of our investment adviser and Portfolio Managers

### **The Investment Adviser**

Yorktown Management & Research Company, Inc., located at 2303 Yorktown Avenue, Lynchburg, Virginia 24501, serves as the Fund's investment adviser. Services provided by the Adviser include the provision of a continuous investment program for the Fund and supervision of all matters relating to the operation of the Fund. Among other things, the Adviser is responsible for making investment decisions and placing orders to buy, sell or hold particular securities, furnishing corporate officers and clerical staff and providing office space, office equipment and office services.

The Adviser has served as the investment adviser to the Fund since its inception. The Adviser was organized in 1984 and is controlled by David D. Basten. David D. Basten, Michael S. Dixon, David M. Basten and Brentz East serve as Portfolio Managers to the Funds and are responsible for the day-to-day management of the Fund's portfolio.

For its services, the Adviser receives a monthly fee from the Fund, calculated at an annual rate of the average daily net assets for the Fund. For the fiscal year ended January 31, 2017, the Fund paid fees to the Adviser of 0.40% as a percentage of average daily net assets.

Pursuant to an Accounting and Pricing Services Agreement (the "Accounting Agreement"), the Adviser also acts as the accounting services agent to the Fund. As the accounting services agent to the Fund, the Adviser maintains and keeps current the books, accounts, records, journals or other records of original entry relating to the Funds' business. For its services as accounting agent, the Adviser receives an asset-based fee, computed daily and paid monthly of the average daily net assets of the Fund, and a minimum fee plus out-of-pocket expenses. For more information, see "Other Service Providers" in the Statement of Additional Information ("SAI").

### **The Portfolio Managers**

Mr. David D. Basten is the Adviser's Chief Investment Officer and a portfolio manager for the Trust, having served in that capacity since commencement of the Fund's operations. Mr. David D. Basten is President and Director of the Adviser, Managing Partner of Waived Enterprises, LLC and partner of Downtown Enterprises.

Mr. David M. Basten has served as portfolio manager since 2005 and prior to that held various positions at the Adviser, including as a securities analyst.

Mrs. Brentz East has served as portfolio manager since 2011 and prior to that held various positions at the Adviser, including as a securities analyst.

Mr. Michael Dixon has served as portfolio manager since 2012 and prior to that was an account manager with the firm Flippin, Bruce, & Porter, Inc., from May, 2002 to 2012. Mr. Dixon has over fifteen years of experience in the financial services industry.

A discussion of the basis for the March 29, 2017 decision of the Board to approve the investment advisory agreements with the Adviser is available in the Trust's Statement of Additional Information, dated May 31, 2017 and the Semi-Annual Report to Shareholders, dated July 30, 2017.

## Section 4 | HOW YOU CAN BUY AND SELL SHARES

---

This section provides the information you need to move money into or out of your account

### **Class C Shares**

Class C shares are sold at net asset value without an initial sales charge. This means that 100% of your initial investment is placed into shares of the Fund. However, Class C shares of the Fund pay an annual 12b-1 shareholder servicing fee of 0.25% of average daily net assets and an additional distribution fee of 0.75% per annum of average daily net assets.

In order to recover commissions paid to dealers on investments in Class C shares, shareholders will be charged a contingent deferred sales charge (“CDSC”) of 1.00% of up to the total value of their redemption if they redeem shares within thirteen (13) months from the date of purchase. No CDSC is charged on reinvested dividends or capital gains, amounts purchased more than thirteen months prior to the redemption, increases in the value of the shares owned, upon the event of the death of the shareholder (unless the account is held in joint name and the survivor liquidates the shares) or shares placed in qualified plans employing a third party administrator.

The Trust reserves the right in its sole discretion to withdraw all or any part of the offering of shares of the Fund when, in the judgment of the Trust’s management, such withdrawal is in the best interest of the Fund. An order to purchase shares is not binding on, and may be rejected by, the Trust until it has been confirmed in writing by the Trust and payment has been received.

### **How To Buy Shares**

You may obtain application forms for the purchase of Class C Shares of the Fund by contacting the shareholder services department (“Shareholder Services”) of Ultimus Asset Services, LLC (the “Transfer Agent”), the Fund’s transfer agent, at the address or telephone number shown below.

Regular Mail:

Yorktown Funds  
c/o Ultimus Asset Services, LLC  
P.O. Box 46707  
Cincinnati, OH 45246-0707

Overnight Mail:

Yorktown Funds  
c/o Ultimus Asset Services, LLC  
225 Pictoria Drive, Suite 450  
Cincinnati, OH 45246

Phone:

(888) 933-8274

Shares are sold at their offering price, which is based upon the net asset value per share next computed after receipt and acceptance of the order by Shareholder Services, plus any applicable sales charge.

The minimum initial investment in Class C Shares is \$1,000, and the minimum for additional investments is \$100.

**Additional Investments.** You may purchase additional Class C Shares of the Fund at any time by mail, wire, or automatic investment. Each additional mail purchase request must contain:

- your name;
- the name on your account(s);
- your account number(s);
- the name of the Fund; and
- a check made payable to the applicable Fund

Checks should be sent to the Fund at the address listed under the heading “How to Invest” (above) in this prospectus. To send a bank wire, call Shareholder Services at (888) 933-8274 to obtain instructions.

**Automatic Investment Plan.** You may make regular investments in the Fund with an Automatic Investment Plan by completing the appropriate section of the account application and attaching a voided personal check. Investments may be made monthly to allow dollar-cost averaging by automatically deducting \$100 or more from your bank checking account. You may change the amount of your monthly purchase at any time. If an Automatic Investment Plan purchase is rejected by your bank, your shareholder account will be charged a fee to defray bank charges.

**Customer Identification and Verification.** In compliance with the USA PATRIOT Act of 2001, the Transfer Agent will verify certain information on your account application as part of the Trust’s Anti-Money Laundering Program. As requested on the account application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing only a P.O. Box will not be accepted. This information will be verified to ensure the identity of all persons opening a mutual fund account. The Trust is required by law to reject your new account application if the required identifying information is not provided. Please contact Shareholder Services at (888) 933-8274 if you need additional assistance when completing your account application.

In certain instances, the Trust is required to collect documents to fulfill its legal obligation. Documents provided in connection with your application will be used solely to establish and verify a customer’s identity. Attempts to collect the missing information required on the application will be performed by either contacting you or, if applicable, your broker. If this information is unable to be obtained within a timeframe established in the sole discretion of the Trust, your application will be rejected. Upon receipt of your application in proper form (meaning that it is complete and contains all necessary information, and has all supporting documentation such as proper signature guarantees, IRA rollover forms, etc.), or upon receipt of all identifying information required on the application, your investment will be received and your order will be processed at the next-determined NAV. However, the Trust reserves the right to close your account at the next-determined NAV if they are unable to verify your identity. Attempts to verify your identity will be performed within a timeframe

established in the sole discretion of the Trust. If the Trust is unable to verify your identity, the Trust reserves the right to liquidate your account at the next-determined NAV and remit proceeds to you via check. The Trust reserves the further right to hold your proceeds until your original check clears the bank. In such an instance, you may be subject to a gain or loss on Fund shares and will be subject to corresponding tax implications.

**Anti-Money Laundering Program.** Customer identification and verification is part of the Trust's overall obligation to deter money laundering under federal law. The Trust has adopted an Anti-Money Laundering Compliance Program designed to prevent the Trust from being used for money laundering or the financing of terrorist activities. In this regard, if the Trust is unable to verify your identity, as required by anti-money laundering laws, we may refuse to open your account or may delay opening your account pending verification of your identity. If we subsequently are unable to verify your identity, we may close your account without further notice and return to you the value of your shares at the next calculated net asset value. The Trust has appointed an officer of Unified Financial Securities, Inc., the Trust's principal underwriter, to serve as AML Officer and to oversee the implementation of the Trust's Anti-Money Laundering Compliance Program.

**Investing by Wire.** Once you have completed an application and the Transfer Agent has verified certain information on your account application form, you may purchase Class A Shares of the Fund by requesting your bank to wire funds directly to the Transfer Agent. To invest by wire please call Shareholder Services at (888) 933-8274 for instructions. Your bank may charge you a fee for this service. Be sure to include your name and account number in the wire instructions that you provide your bank. Once your account is opened, you may make additional investments using the wire procedure described above.

**Investing by Mail.** For initial purchases, the account application should be completed, signed and mailed to the Transfer Agent, together with your check payable to the applicable Fund. Please be sure to specify the class of shares in which you wish to invest. For subsequent purchases, include with your check the tear-off stub from a prior purchase confirmation, or otherwise identify the name(s) of the registered owner(s) and tax identification number(s).

**Right of Refusal.** The Trust may reject or cancel any purchase orders, including exchanges, for any reason.

**Other Purchase Information.** The Fund may limit the amount of purchase and refuse to sell shares to any person. If your check or wire does not clear, you will be responsible for any loss incurred by the Fund. You may be prohibited or restricted from making future purchases in such Fund. Checks must be made payable to the Fund in which you wish to invest. The Fund and its transfer agent may refuse any purchase order for any reason. Cash, third party checks (except for properly endorsed IRA rollover checks), counter checks, starter checks, traveler's checks, money orders (other than money orders issued by a bank), credit card checks, and checks drawn on non-U.S. financial institutions will not be accepted. Cashier's checks, bank official checks, and bank money orders may be accepted in amounts greater than \$10,000. In such cases, a fifteen (15) business day hold will be applied to the funds (which means that you may not redeem your shares until the holding period has expired). The Fund has authorized certain broker-dealers and other financial institutions (including their designated intermediaries) to accept on its behalf purchase and sell orders. The Fund is deemed to have received an order when the authorized person or designee accepts the order, and the order is processed at the net asset value next calculated thereafter. It is the responsibility of the broker-dealer or other financial institution to transmit orders promptly to the Fund's transfer agent.

## How To Sell Shares

You may sell your Class C Shares in three different ways:

- by mailing a written redemption request for a check or wire representing the redemption proceeds to Shareholder Services;
- by making a telephone request for redemption by check (provided that the amount to be redeemed is not more than \$50,000 and the check is being sent to the record address for the account, which has not changed in the prior three months); or
- by making a telephone request for redemption proceeds to be wired to a predesignated bank.

**Redemptions by Mail.** A written request for redemption must include the name of the Fund, the class of shares, your account number, the exact name(s) in which your shares are registered, the number of shares or the dollar amount to be redeemed and mailing or wiring instructions. Upon timely receipt by Shareholder Services of a redemption request in “good order,” as described below, the shares will be redeemed at the net asset value per share computed at the close of regular trading on the NYSE on that day. Redemption requests received after the close of regular trading will be executed at the net asset value per share next computed. The signature(s) on all redemptions of \$50,000 or more or redemptions requesting that the proceeds check be made payable to someone other than the registered owner(s) or sent to an address other than the record address (or sent to the record address if that address has been changed in the previous three months) must be guaranteed by a member of the Securities Transfer Agents Medallion Program (STAMP), the Stock Exchanges Medallion Program (SEMP) or the New York Stock Exchange, Inc.’s Medallion Signature Program (MSP). Signature guarantees from a notary public are not acceptable. Other supporting legal documents may be required from corporations or other organizations, fiduciaries or persons other than the stockholder of record making the redemption request.

**Telephone Redemptions.** To redeem shares by telephone, call Shareholder Services directly at (888) 933-8274. Telephone redemptions are not available for retirement plans other than individual retirement accounts. When a redemption request is made by telephone, a shareholder may choose to receive redemption proceeds either by having a check payable to the shareholder mailed to the address of record on the account, provided the address has not changed during the past three months and the redemption amount does not exceed \$50,000, or by having a wire sent to a previously designated bank account.

Telephone redemptions by check are available to all shareholders of the Funds automatically unless this option is declined in the application or in writing. Shareholders may select the telephone redemption wire service when filling out the initial application or may select it later by completing the appropriate form that is available from Shareholder Services.

A telephone redemption request must be received by Shareholder Services prior to the close of regular trading on the NYSE. If a telephone request is made after the close of regular trading on the NYSE or on a day when the NYSE is not open for business, the Funds cannot accept the request and a new request will be necessary. Shareholders may avoid the possibility of having to re-submit a redemption request by using any other regular means of request described in this prospectus.

**Wire Redemptions.** Wire redemptions by telephone may be made only if the bank is a member of the Federal Reserve System or has a correspondent bank that is a member of the System. If the account is with a savings bank, it must have only one correspondent bank that is a member of the Federal Reserve System. If a shareholder decides to change the bank account to which proceeds are to be wired, the change must be effected by filling out and submitting in advance the appropriate form that is available from Shareholder Services.

**Other Information.** Proceeds resulting from a redemption request normally will be mailed to you or wired to your bank the next business day after receipt of a request in “good order,” as defined under “Exchange Privileges,” below. The Funds, however, may delay sending redemption proceeds for up to seven days. If Fund shares were purchased by check and are redeemed within 15 days of such purchase, you may experience additional delays in receiving redemption proceeds. The Fund generally will postpone sending redemption proceeds from an investment made by check until the Trust can verify that the check has been or will be collected. There will be no such delay for redemptions following investments paid for by federal funds wire or by bank cashier’s check or certified check. If checks representing redemption proceeds are returned “undeliverable” or remain uncashed for six months, such checks shall be canceled and such proceeds shall be reinvested in the Funds at the NAV per share determined as of the date of cancellation of such checks. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Other supporting legal documents may be required from corporations or other organizations, fiduciaries or persons other than the stockholder of record making the redemption request. If there is a question concerning the redemption of Fund shares, contact Shareholder Services.

The Fund may not suspend the right of redemption, or postpone payment for more than seven days, except when the NYSE is closed other than weekends or holidays, when trading on the NYSE is restricted (as determined by the SEC), during an emergency (as determined by the SEC) that makes it impracticable for the Fund to dispose of its securities or to determine fairly the value of its net assets, or during any other period permitted by the SEC for the protection of investors.

## Section 5 | GENERAL INFORMATION

---

This section summarizes the Funds' distribution policies and other general Fund information

### Dividends, Distributions And Taxes

**Dividends and Other Distributions.** The Fund declares and pays dividends from its net investment income (including dividends from Underlying Funds) and distributes any net capital gains realized from the sale of its portfolio securities (including shares of Underlying Funds) at least annually. Unless the Trust receives written instructions to the contrary from a shareholder before the record date for a distribution, the shareholder will receive that distribution in additional Fund shares of the distributing class at their NAV on the reinvestment date.

**Taxation of Shareholders.** Dividends and other distributions by the Fund to its shareholders, other than tax-exempt entities (including individual retirement accounts and qualified retirement plans), are taxable to them regardless of whether the distributions are received in cash or reinvested in additional Fund shares. Dividends from the Fund's investment company taxable income (generally consisting of net investment income, plus the excess of net short-term capital gain over net long-term capital loss) generally are taxable as ordinary income (except as mentioned below), whereas distributions of the Fund's net capital gain (*i.e.*, the excess of net long-term capital gain over net short-term capital loss) are taxable as long-term capital gains, regardless of how long the shareholder held its shares.

The Fund's dividends attributable to "qualified dividend income" (*i.e.*, dividends it receives on stock of most U.S. corporations and certain foreign corporations with respect to which the Fund satisfies certain holding period, debt-financing, and other restrictions, including dividends from any Underlying Fund attributable to dividends from such corporations with respect to which the Underlying Fund satisfies those restrictions) ("QDI") generally are subject to federal income tax at the rates applicable to net long-term capital gain, including a 20% maximum rate, for individual shareholders who satisfy those restrictions with respect to their shares on which the Fund dividends were paid. If the Fund's QDI is at least 95% of its gross income (as specially computed), the entire dividend will qualify for that treatment. A portion of the Fund's dividends — not exceeding the aggregate dividends it receives from domestic corporations only — also may be eligible for the dividends-received deduction allowed to corporations, subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to the dividends-received deduction are subject indirectly to the federal alternative minimum tax.

Distributions to you of the Fund's net capital gain, including gain it realizes on the redemption of any Underlying Fund's shares it held for more than one year and distributions from any Underlying Fund of the latter's net capital gain, also are subject to a 20% maximum federal income tax rate for individual shareholders.

The portion of the dividends the Income Fund pays that are attributable to interest earned on its investments that are direct U.S. Government obligations generally are not subject to state and local income taxes. The Fund advises its shareholders of the tax status of distributions following the end of each calendar year.

A redemption of Fund shares will result in taxable gain or loss to the redeeming shareholder, depending on whether the redemption proceeds are more or less than the shareholder's adjusted basis in the redeemed shares. An exchange of the Fund's shares for shares of another Fund will have similar tax consequences. Capital gain recognized on a redemption or exchange of Fund shares held for more than one year will be long-term capital gain and will be subject to federal income tax, for an individual shareholder, at the maximum 20% rate mentioned above.

The foregoing only summarizes some of the important federal income tax considerations generally affecting the Funds and their shareholders; see the SAI for a further discussion. Because other federal, state, or local tax considerations may apply, investors are urged to consult their tax advisors.

## **Net Asset Value**

The offering price of the Fund's Shares is based upon the Fund's net asset value ("NAV") per share, plus any applicable sales charges. NAV per share is determined as of the close of trading on the New York Stock Exchange ("NYSE") (generally, 4:00 p.m. Eastern time) on each business day that the NYSE is open. The NAV per share is computed by adding the total value of the Fund's investments and other assets (including dividends accrued but not yet collected) attributable to the Fund's Class A, Institutional Class or Class L Shares, subtracting any liabilities (including accrued expenses) attributable to the Fund's Class A, Institutional Class or Class L Shares, and then dividing by the total number of the applicable class' shares outstanding. Due to the fact that different expenses may be charged against shares of different classes of the Fund, the NAV of the different classes may vary.

Shares of open-end Underlying Funds are valued at their respective NAV under the 1940 Act. The Underlying Funds generally value securities in their portfolios for which market quotations are readily available at their current market value (generally the last reported sales price) and all other securities and assets at fair value pursuant to methods established in good faith by the board of trustees of the Underlying Fund. Money market funds with portfolio securities that mature in 397 days or less may use the amortized cost to value their securities or penny-rounding methods to compute their price per share. Securities that are listed on U.S. exchanges (other than exchange traded funds ("ETFs")) are valued at the last sales price on the day the securities are valued or, lacking any sales on such day, at the previous day's closing price. ETFs are valued at the last sales price on the ETFs primary exchange on the day the securities are valued or, lacking any sales on such day, either at the value assigned by a nationally recognized third-party pricing service or at the previous day's closing price. Securities listed on NASDAQ are valued at the NASDAQ Official Closing Price. U.S. Treasury securities and corporate bonds are priced at an evaluated mean of the last bid and asked prices available prior to valuation. Other securities traded in the OTC market are valued at the last bid price available prior to valuation.

Other Fund assets are valued at current market value or, where unavailable or unreliable, at fair value as determined in good faith by or under the direction of the Board. Debt securities having 60 days or less remaining to maturity generally are valued at their amortized cost.

Events or circumstances affecting the values of portfolio securities that occur between the closing of their principal markets and the time the NAV of Fund shares is determined, such as foreign securities trading on foreign exchanges that close before the time the NAV of Fund shares is determined, may be reflected in the Trust's

calculations of net asset values for certain Funds when the Trust deems that the event or circumstance would materially affect such Fund's net asset value. Such events or circumstances may be company specific, such as an earning report, country or region specific, such as a natural disaster, or global in nature. Such events or circumstances also may include price movements in the U.S. securities markets.

The effect of fair value pricing as described above is that securities may not be priced on the basis of quotations from the primary market in which they are traded, but rather may be priced by another method that the Board believes reflects fair value. As such, fair value pricing is based on subjective judgments and it is possible that the fair value may differ materially from the value realized on a sale. This policy is intended to assure that the Fund's net asset value fairly reflects security values as of the time of pricing. Also, fair valuation of the Fund's securities can serve to reduce arbitrage opportunities available to traders seeking to take advantage of information available to them that is not the basis of Trust valuation actions, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by those traders.

If a security or securities that the Fund owns are traded after the NYSE is closed (for example, on an after-hours market) the value of the Fund's assets may be affected on days when the Fund is not open for business. In addition, trading in some of the Fund's assets may not occur on days when the Fund is open for business.

## **Fair Value Pricing**

The Board of Trustees has delegated to the Advisor responsibility for determining the value of Fund portfolio securities under certain circumstances. Under such circumstances, the Advisor will use its best efforts to arrive at the fair value of a security held by the Fund under all reasonably ascertainable facts and circumstances. The Advisor must prepare a report for the Board not less than quarterly containing a complete listing of any securities for which fair value pricing was employed and detailing the specific reasons for such fair value pricing. The Funds have adopted written policies and procedures to guide the Advisor with respect to the circumstances under which, and the methods to be used, in fair valuing securities.

When a security is fair value priced, it means that the Advisor is calculating the value of that security on a day and under circumstances where reliable pricing information from normal sources is not available. Accordingly, there is always the possibility that the Advisor's calculations concerning security value could be wrong, and as a result, the Fund's NAV on that day could be higher or lower, depending on how the security was valued, than would otherwise be the case.

Requests to purchase and sell shares are processed at the NAV next calculated after we receive your order in proper form.

## **Frequent Trading**

The Funds are intended to be used as long-term investments. The Trust discourages frequent purchases, redemptions or exchanges of Fund shares and does not accommodate such trading. "Market-timers" who engage in frequent purchases, redemptions or exchanges over a short period of time can disrupt the Fund's investment program and create additional transaction costs that are borne by all shareholders of the Fund. The Board has adopted policies and procedures to detect and prevent frequent purchases, redemptions or exchanges

of Fund shares by shareholders, and seeks to apply these policies and procedures to all shareholders. Although such policies and procedures may not be successful in detecting or preventing excessive short-term trading in all circumstances, the Trust's policies and procedures provide that each of the Funds may temporarily suspend or terminate purchase, redemption or exchange transactions by any investors, potential investors, groups of investors or shareholders who engage in short-term trading activity that may be disruptive to the Trust or any of its Funds. It may be difficult to identify whether particular orders placed through banks, broker-dealers, investment representatives or other financial intermediaries may be excessive in frequency and/or amount or otherwise disruptive to the Funds when such trading activity takes place at the level of omnibus accounts established in the Trust's name by such financial intermediaries. Accordingly, the Trust's policies and procedures seek to consider all trades placed in a combined order through an omnibus account by a financial intermediary as part of a group to determine whether such trades may be rejected in whole or in part.

The Funds or the Underlying Funds may invest in foreign securities, and may be subject to the risks associated with market timing and short-term trading strategies to a greater extent than funds that do not. Securities trading in foreign markets may present time zone arbitrage opportunities when events affecting portfolio securities' values occur after the close of the foreign markets but prior to the close of the U.S. markets. The Funds and the Underlying Funds have adopted policies and procedures designed to adjust closing market prices of foreign securities under certain circumstances to reflect their fair value as of the valuation time. To the extent that the Funds or the Underlying Funds do not accurately value foreign securities as of the Fund's valuation time, investors engaging in price arbitrage may cause dilution in the value of the Fund's shares held by other shareholders. The Funds or the Underlying Funds may invest in small capitalization equity securities. Because such securities may be infrequently traded, short-term traders may seek to trade shares of the Funds in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any successful price arbitrage also may cause dilution in the value of the shares of the Funds held by other shareholders.

## Acquired Fund Fees And Expenses

An SEC rule adopted in 2006, requires the Trust to report total expense ratios in its prospectus fee tables that account for both the expenses that the Fund pays directly out of its assets (sometimes called "direct expenses"), and the expense ratios of the underlying funds (including business development companies (BDCs)) in which the Fund invests (often called "acquired fund fees" or "indirect expenses"). The disclosure of the Fund's indirect expenses in the Fund's fee table is contained in the acquired fund fees and expenses (AFFEs) line item. This disclosure is designed to provide investors with a better understanding of the actual costs of investing in the Fund that invests in other funds, which have their own expenses that may be as high, or higher, than the acquiring Fund's expenses.

**Direct Fund Expenses:** Expenses and fees such as management fees and custody fees typically accrue daily and are paid monthly. These expenses are borne directly by the Fund and reduce the Fund's net assets, thus detracting from total return.

**Indirect Fund Expenses:** AFFEs are not accrued daily, nor are they paid directly from the Fund's net assets. They reflect the Fund's pro rata share of fees and expenses incurred by investing in acquired funds. AFFEs are reflected in the prices of the acquired funds, and thus are included in the total returns of the Fund.

### **Are AFFE reflected in the Fund's financial statements?**

No. Because acquired fund fees and expenses are not borne directly by the Fund, they will not be reflected in the expense information in the Fund's financial statements or the Fund's financial highlights included in the Fund's reports to shareholders.

### **Distribution And Service Plans**

The Adviser or Distributor, out of its own resources and without additional cost to the Funds or their shareholders, may provide additional cash payments or non-cash payments to intermediaries who sell shares of the Funds. Such payments and compensation are in addition to the service fees paid by the Funds. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. Cash compensation may also be paid to intermediaries for inclusion of the Funds on a sales list, including a preferred or select sales list, in other sales programs or as an expense reimbursement in cases where the intermediary provides shareholder services to Fund shareholders. The Adviser or Distributor may also pay cash compensation in the form of finder's fees that vary depending on the Fund and the dollar amount of shares sold.

### **Rule 12b-1 Fees**

The Board has adopted a Plan of Distribution for the Fund's Class L Shares and Class A Shares of three Funds (the "12b-1 Plan"). Pursuant to the 12b-1 Plan, the Funds may finance from the assets of Class L Shares certain activities or expenses that are intended primarily to result in the sale of shares of such class. The Fund finances these distribution and service activities through payments made to the Distributor. The fee paid to the Distributor by the Fund is computed on an annualized basis reflecting the average daily net assets of a class, equal to 1.00% for Class L Share expenses. Of this amount, 0.75% represents distribution fees and 0.25% represents shareholder servicing fees paid to institutions that have agreements with the Distributor to provide such services. Because these fees are paid out of a Class L Shares' assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost more than paying other types of sales charges.

The 12b-1 Plan also covers the Class A Shares of the Income Fund, Capital Income Fund, and Master Allocation Fund. Pursuant to the 12b-1 Plan, those three Funds may finance from the assets of their Class A Shares certain activities or expenses that are intended primarily to result in the sale of shares of such class. The Funds finance these distribution and service activities through payments made to the Distributor. The fee paid to the Distributor by the Funds is computed on an annualized basis reflecting the average daily net assets of a class, equal to a maximum of 0.50% for Class A Share expenses. Because these fees are paid out of a Class A Shares' assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost more than paying other types of sales charges. The Funds may voluntarily reduce the rate of 12b-1 fees charged from time to time.

In addition to paying fees under the 12b-1 Plan, the Funds may pay service fees to intermediaries such as banks, broker-dealers, financial advisors or other financial institutions, including affiliates of the Adviser or

Distributor, for sub-administration, sub-transfer agency and other shareholder services associated with shareholders whose shares are held of record in omnibus, other group accounts or accounts traded through registered securities clearing agents.

## **Payments to Financial Intermediaries**

From time to time, the Adviser and/or its affiliates, at their discretion, may make payments to certain affiliated or unaffiliated financial intermediaries to compensate them for the costs associated with making shares of the Funds available to their customers or registered representatives, including costs for providing the Fund with “shelf space” and/or placing the Fund on a preferred or recommended fund list. For purposes of this discussion, “Financial Intermediaries” include affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a similar arrangement with the Funds and/or their affiliates. These payments are sometimes characterized as “revenue sharing” payments and are made out of the Adviser’s and/or its affiliates’ own legitimate profits or other resources, and are not paid by the Funds. These arrangements may apply to any or all shares, including shares sold or held through programs such as retirement plans, qualified tuition programs, fund supermarkets, fee-based advisory or wrap fee programs, bank trust programs, and insurance (*e.g.*, individual or group annuity) programs. To the extent permitted by SEC and FINRA rules and other applicable laws and regulations, the Adviser and/or its affiliates may pay or allow other promotional incentives or payments to Financial Intermediaries. For more information please see “Payments to Financial Intermediaries” in the Fund’s SAI.

The level of payments to individual Financial Intermediaries varies in any given year and may be negotiated on the basis of sales of Fund shares, the assets of the Funds that are attributable to investments by customers of the Financial Intermediary or the quality of the Financial Intermediary’s relationship with the Adviser and/or its affiliates. These payments may be more or less than the payments received by the Financial Intermediaries from other mutual funds and may influence a Financial Intermediary to recommend or offer certain funds or share classes over other investment alternatives. In certain instances, the payments could be significant and may cause a conflict of interest for your Financial Intermediary. Any such payments will not change the net asset value or price of the Fund’s shares.

The Adviser and/or its affiliates currently have “revenue sharing” arrangements with several Financial Intermediaries.

Please contact your Financial Intermediary for information about any payments it may receive in connection with the sale of Fund shares, as well as information about any fees and/or commissions it charges.

## **General Information**

### **Small Account Fees**

Due to the relatively higher cost of maintaining small accounts, the Funds may deduct \$25 per year from your account if your account has a value of less than \$500 or may redeem the shares in your account if your account

has a value of less than \$25. If the Fund elects to redeem such shares, it will notify you of its intention to do so, and provide you with the opportunity to increase the amount invested to \$500 or more within 30 days of notice. If you bring your account balance up to the required minimum no account fee or involuntary redemption will occur. The Fund will not close your account if it falls below the required minimum solely because of a market decline. The Fund reserves the right to waive this fee or redemption requirement.

The Funds may eliminate duplicate mailings of portfolio materials to shareholders who reside at the same address, unless instructed to the contrary. Investors may request that the Fund send these documents to each shareholder individually by calling Shareholder Services at (888) 933-8274.

### **Systematic Investment Plan**

You may purchase Fund shares through a Systematic Investment Plan. Under the Plan, your bank checking account will automatically be debited monthly or quarterly in an amount equal to at least \$100 (subject to the minimum initial investment of \$1,000). You may elect to participate in the Systematic Investment Plan when filling out the initial application or may elect to participate later by completing the appropriate form that is available from Shareholder Services.

### **Systematic Withdrawal Plan**

If you have made an initial investment of at least \$10,000 in any of the Funds, or have otherwise accumulated shares valued at no less than \$10,000, you are eligible to sell shares through a Systematic Withdrawal Plan. If so eligible, you may arrange for fixed withdrawal payments (minimum payment — \$100; maximum payment — 1% per month or 3% per quarter of the total net asset value of Fund shares in the shareholder account at inception of the Systematic Withdrawal Plan) at regular monthly or quarterly intervals. Withdrawal payments will be made to you or to the beneficiaries designated by you. You are not eligible to sell shares through a Systematic Withdrawal Plan if you are making regular purchase payments pursuant to the Systematic Investment Plan. You may elect to participate in the Systematic Withdrawal Plan when filling out the initial application or may elect to participate later by completing the appropriate form that is available from Shareholder Services.

### **Exchange Privileges**

You may exchange Shares of any Fund for the identical Class Shares of any other Fund. If you exchange Class A Shares that you purchased without a sales charge or with a lower sales charge into the Fund with a sales charge or with a higher sales charge, the exchange is subject to a sales charge equal to the difference between the lower and higher applicable sales charges. If you exchange Class A Shares into the Fund with the same, lower or no sales charge there is no sales charge for the exchange. Additionally, the amount of your exchange must meet any initial or subsequent purchase minimums applicable to the Fund into which you are making the exchange.

You may also exchange your Fund shares into the Federated Prime Cash Obligations Fund, which is an unaffiliated, separately managed, money market mutual fund. There is no sales charge for the exchange. This exchange privilege is offered as a convenience to you. For an exchange into the Federated Prime Cash Obligations Fund, you must first receive that Fund's prospectus. The exchange privilege must also be selected on your account application form.

You may place exchange orders in writing with Shareholder Services, or by telephone, if a written authorization for telephone exchanges is on file with Shareholder Services. All permitted exchanges will be effected based on the NAV per share of the Fund that is next computed after receipt by Shareholder Services of the exchange request in “good order.” An exchange request is considered in “good order” only if the dollar amount or number of shares to be purchased is indicated and the written request is signed by the registered owner and by any co-owner of the account in exactly the same name or names used in establishing the account. Other supporting legal documents may be required from corporations or other organizations, fiduciaries or persons other than the stockholder of record making the exchange request.

The exchange privilege may be modified or terminated at any time upon 60 days’ written notice to shareholders. Before making any exchange, you should contact Shareholder Services or your broker to obtain more information about exchanges. For tax purposes, an exchange is treated as a redemption of one Fund’s shares and a subsequent purchase of the other Fund’s shares. Any capital gain or loss on the exchanged shares should be reported for income tax purposes. The price of the acquired shares will be their cost basis for those purposes.

The Board of Trustees of the Trust has approved a Code of Ethics (the “Code”) for the Funds and Advisor. The Funds’ Principal Underwriter has also adopted a Code of Ethics which governs its activities as an Underwriter. These Codes govern the personal activities of persons who may have knowledge of the investment activities of the Funds, requires that they file regular reports concerning their personal securities transactions, and prohibits activities that might result in harm to the Fund. The Board is responsible for overseeing the implementation of the Codes. The Funds have filed copies of each Code with the Securities and Exchange Commission. Copies of the Codes of Ethics may be reviewed and copied at the SEC’s Public Reference Room in Washington, DC. The Codes are also available on the SEC’s EDGAR database at the SEC’s web site ([www.sec.gov](http://www.sec.gov)). Copies of this information can be obtained, after paying a duplicating fee, by electronic request ([publicinfo@sec.gov](mailto:publicinfo@sec.gov)), or by writing the SEC’s Public Reference Section, Washington, DC 20549-0102.

## **Cost Basis**

For those securities defined as “covered” under current IRS cost basis tax reporting regulations, the Funds are responsible for maintaining accurate cost basis and tax lot information for tax reporting purposes. The Funds are not responsible for the reliability or accuracy of the information for those securities that are not “covered.” The Funds and their service providers do not provide tax advice. You should consult independent sources, which may include a tax professional, with respect to any decisions you may make with respect to choosing a tax lot identification method.

Federal law requires that mutual fund companies report their shareholders’ cost basis, gain/loss, and holding period to the IRS on the fund’s shareholders’ Consolidated Form 1099s when “covered” securities are sold. Covered securities are any regulated investment company and/or dividend reinvestment plan shares acquired on or after January 1, 2012. The Trust has chosen the average cost method as its standing (default) cost basis method for all shareholders. Under this method, the Funds will average the cost of all shares held by a shareholder for tax reporting purposes. Each shareholder has the option to elect a different cost basis method by notifying the Fund in writing. A tax lot identification method is the way the Funds will determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing net asset

values, and the entire position is not sold at one time. The Funds' standing tax lot identification method is the method covered shares will be reported on your Consolidated Form 1099 if you do not select a specific tax lot identification method. You may choose a method different than the Funds' standing method and will be able to do so at the time of your purchase or upon the sale of covered shares. Please refer to the appropriate Internal Revenue Service regulations or consult your tax advisor with regard to your personal circumstances.

## Privacy Policy

The following is a description of the Funds' policies regarding disclosure of nonpublic personal information that you provide to the Fund or that the Fund collects from other sources. In the event that you hold shares of the Fund through a broker-dealer or other financial intermediary, the privacy policy of your financial intermediary would govern how your nonpublic personal information would be shared with nonaffiliated third parties.

**Categories of Information the Fund Collects.** The Fund collects the following nonpublic personal information about you:

- Information the Fund receives from you on or in applications or other forms, correspondence, or conversations (such as your name, address, phone number, social security number, assets, income and date of birth); and
- Information about your transactions with the Fund, its affiliates, or others (such as your account number and balance, payment history, parties to transactions, cost basis information, and other financial information).

**Categories of Information the Fund Discloses.** The Fund does not disclose any nonpublic personal information about its current or former shareholders to unaffiliated third parties, except as required or permitted by law. The Fund is permitted by law to disclose all of the information it collects, as described above, to its service providers (such as the Fund's custodian, administrator and transfer agent) to process your transactions and otherwise provide services to you.

**Confidentiality and Security.** The Fund restricts access to your nonpublic personal information to those persons who require such information to provide products or services to you. The Fund maintains physical, electronic, and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

## Section 6 | FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance for the past five years (or inception date, as applicable). Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Tait, Weller & Baker LLP, independent registered public accounting firm, whose report, along with the Funds' financial statements, are included in the Funds' Annual Report, dated January 31, 2017, which is available upon request.

### Yorktown Multi-Asset Income Fund

#### Financial Highlights

#### Class C Shares

	For the Period Ended Jan. 31,
	2017*
<b>For a share outstanding throughout each year/period</b>	
Net asset value, beginning of year/period	\$9.00
<b>Income from investment operations</b>	
Net investment income (loss) <sup>(1)(2)</sup>	0.44
Net realized and unrealized gain (loss) on investments	0.63
<b>Total income (loss) from investment operations</b>	<b>1.07</b>
<b>Distributions</b>	
Net investment income	(0.48)
<b>Total distributions</b>	<b>(0.48)</b>
<b>Net asset value, end of year/period</b>	<b>\$9.59</b>
<b>Total Return<sup>(4)</sup></b>	<b>12.17%</b>
<b>Ratios/Supplemental Data</b>	
Net assets, end of period (000's omitted)	\$6,267
Ratio of expenses to average net assets <sup>(3)(5)</sup>	1.63%
Ratio of net investment income (loss) to average net assets <sup>(3)(5)</sup>	6.35%
Portfolio turnover rate <sup>(4)</sup>	102%

\* Commencement of operations was May 6, 2016

(1) Per share information has been calculated using the average number of shares outstanding.

(2) Recognition of net investment income by the Fund is affected by the timing of the declaration of dividends by the underlying investment companies in which the Fund invests.

(3) Does not include expenses of the investment companies in which the Fund invests

(4) Not annualized for periods less than one year.

(5) Annualized
