There is no guarantee that a diversified portfolio will outperform a non-diversified portfolio, or that diversification among different asset classes reduces risk. Each asset class presents unique risks that should be carefully considered before investing. Asset allocation and diversification do not ensure a profit or guarantee against loss. Current performance maybe lower or higher than the performance data quoted.

A Fund's direct or indirect investments in foreign securities, including depositary receipts, involve risks not associated with investing in U.S. securities that can adversely affect the Fund's performance. Foreign markets, particularly emerging markets, may be less liquid, more volatile and subject to less government supervision than domestic markets.

Asset allocation and diversification do not ensure a profit or guarantee against loss. Mid-cap, Small-Cap and Micro-cap investing involves greater risk not associated with investing in more established companies, such as greater price volatility, business risk, less liquidity and increased competitive threat.
