### Morningstar Rating™ in the Allocation – 30-50% Equity Category

**Overall ★★★★★ (4 star)**  
506 Funds in Category

As of December 31, the Fund's Institutional share class received a 4-Star overall rating in the Allocation-30% to 50% Equity category.

The Morningstar Rating for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Fund had the following ratings as of 12/31/19, respectively: (1) for APIUX: 3 Year, 2 Stars; 5 Year, 3 Stars; 10 Year, 2 Stars; Overall, 2 Stars (2) for AFFIX: 3 Year, 3 Stars; 5 Year, 3 Stars; 10 Year, 2 Stars; Overall, 2 Stars (3) APIIX: 3 Year, 3 Stars; 5 Year, 4 Stars; 10 Year, 3 Stars; Overall, 4 Stars. The number of funds in the category: 3 yr, 506; 5 yr, 419; 10 yr, 270; Overall, 506.

### Notes + Important Disclosures

<sup>1</sup> Alpha and Beta measured against Morningstar Conservative Allocation Category. Alpha is a measure of risk of an investment relative to the best match market index. Beta is the sensitivity of a stock's returns to the returns on the best match market index.

<sup>2</sup> Duration measures the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices.

<sup>3</sup> Average Individual Corporate Bond Price: 100.23

<sup>4</sup> Average Preferred/Baby Bond Price: 25.23

**Fi360 Fiduciary Score® as of 12/31/2019**

The fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The criteria include total returns, risk-adjusted returns, expenses, and other portfolio statistics. Investments are ranked according to their ability to meet due diligence criteria on a monthly basis. The rank becomes the fi360 Fiduciary Score. The fi360 Fiduciary Score Average is a one-, three-, five-, or ten-year rolling average of an investment's Fiduciary Score. **Important Disclosures (continued)**

Investments in real estate investment trusts ("REITs") and real-estate related securities involve special risks associated with an investment in real estate, such as limited liquidity and interest rate risks and may be more volatile than other securities. In addition, the value of REITs and other real estate-related investments is sensitive to changes in real estate values, extended vacancies of properties and other environmental and economic factors.
